LAB 4.1 Item List Showing and Sorting

4.1.1 Get back to the exercise 2.2, if the list of items is long, organize them in different pages (**pagination**), let the users choose the number of items in 1 page (i.e. 20, 40, 50, 100, …) Write programming code in PHP to complete this.

4.1.2 Use **Lazy Loading** to load the same items as in 4.1.1. Your users can scroll down the page with the mouse wheel and they can see the items loaded.
